

GL100

➔ Glass Door Lock

Material: Zinc Alloy

Verification method: Password and Card

Battery: 4AA batteries

Battery life: >3000 times

Working voltage: DC 6V

Low voltage warning: <5V

Capacity: 200 cards, 10 passwords

Pin capacity: 10 group (1~6 digit)

Operating Temperature: -10°C - 45°C

Glass door thickness required: 8~12mm

Features

- ▶ Automatically open and close
- ▶ Easy installation and operation
- ▶ Password protection function
- ▶ Door 'Ajar' alert
- ▶ Illegal operation warning
- ▶ Low battery reminding
- ▶ Emergency power connector
